

SAMRAH SAYYED

Detail-driven Electrical and Computer Engineering student with strong interests in Data Science, AI/ML, and Embedded Systems.

☎ +918097849401 ✉ ssamrah05@gmail.com 📠 samrahsayyed 📍 Pune, India

PROFESSIONAL SUMMARY

Detail-driven Electrical and Computer Engineering student with strong interests in Data Science, AI/ML, and Embedded Systems. Skilled in Python, C/C++, SQL, and modern frameworks (TensorFlow, PyTorch, scikit-learn). Experienced in developing intelligent systems, database-driven applications, and IoT prototypes, recognized for problem-solving, leadership, and research initiatives with practical and award-winning applications.

EDUCATIONS

MIT WORLD PEACE UNIVERSITY

Bachelor's in Technology in Electrical and Computer Engineering

Aug 2023 - Present

CGPA : 7.93

PROJECTS

Integration of Sensor with ECU over CAN Protocol

Aug 2025 - Jan 2026

Researcher

- Designed an embedded communication system using STM32 microcontrollers.
- Developed scalable automotive/industrial platform ensuring real-time reliability.

Technologies / Tools Used : STM32, Embedded Programming

SkillLink- Mini Social Media Web Application

Aug 2025 - Oct 2025

Developer

- Full-stack MySQL-backed web application with authentication, profiles, posts, comments, and messaging.
- Integrated frontend and backend for database-driven web development.

Technologies / Tools Used : MySQL, Tailwind CSS, JavaScript, ReactJs, NodeJs

Home Automation Project

Developer

- Developed an IoT-based smart home prototype with remote fan control and real-time monitoring (temperature, humidity, gas, motion), via Blynk.
- Implemented OLED feedback, ambient light detection, and RF communication.

Technologies / Tools Used : Blynk IoT, Arduino IDE

SKILLS

Programming Languages : Python, C, C++, SQL, MATLAB, JavaScript, PHP

Frameworks & Libraries : TensorFlow, PyTorch, scikit-learn, Keras, Node.js

Tools & Platforms : GitHub, Microsoft Excel, Google Colab, Git

Databases : MySQL, MongoDB

Soft Skills : Problem Solving, Time Management, Adaptability

Languages : English, Hindi, Marathi, French, Japanese

AWARDS & ACHIEVEMENTS

- Accepted Conference Paper in January 2026, titled - Design and Implementation of Multi-Sensor Integration using STM32 over CAN-Based Communication Framework
- Research Poster Competition - 2nd Place (Digi Agri Cloud Poster)
- Elected student representative, facilitating communication between faculty and students.
- Coordinated academic events, workshops, and mentoring initiatives to enhance engagement across the department.

EXTRA-CURRICULAR AND INITIATIVES

Coordinated planning and execution of inter-departmental academic, sports, and cultural events under the Triangle Trophy program.

Managed event logistics, team coordination, and scheduling to ensure smooth operations and maximize participation.
